Drawings

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: "52", figures 1B, 4B, 13-15 and "274" (should be 374), figures 19A, 19B. Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 24, 30, 32, and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Retz (4501327).

Retz discloses a down hole device having an outer tubular member 54, a series of longitudinally offset slots, and an inner cylindrical member 42 within member 54; the method of expanding comprising lowering the device through tubing 14 to a desired level, applying a first upward force to member 42 (col. 7, line 10), moving member 54 via a downward force (col. 8, line 10), expanding the outer tubular member to a diameter larger than member 42, contacting the member 54 against the well, providing a plug 48, and providing an elastomeric cover member 66.

Claim 52 is rejected under 35 U.S.C. 102(b) as being anticipated by Woolley (3706342).

Woolley discloses first anchor member 22, second anchor 26 associated with the first, and setting tool means 15 for the anchors.

Allowable Subject Matter

Claims 1-23, 41-51, 55, and 56 are allowed.

Claims 25-29, 31, 33, 35-40, 53 and 54 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
